const FAQ_DATA = [
  { q: 'What government subsidies are available for EVs in India?', a: 'Under FAME II, you can
get up to ₹1.5 lakh subsidy on electric cars and up to ₹15,000 on electric scooters. Many state
governments offer additional subsidies ranging from ₹5,000 to ₹1 lakh.' },
  { q: 'How long does it take to charge an EV?', a: 'It depends on the charger type. AC home
charger: 6-12 hours for a full charge. DC fast charger: 1-2 hours for 80% charge. Ultra-fast
(800V): 20-30 minutes for 80% charge.' },
  { q: 'How do I book a test drive on RideAlong?', a: 'Browse our EV listings, click "Book Test
Drive" on any EV card, fill in your preferred date, time slot, and location. We\'ll confirm within 24
hours.' },
  { q: 'What is the real range of an EV?', a: 'Actual range is typically 10-20% less than the
certified ARAI range due to AC usage, driving speed, and load. Plan for 80% of the certified
range for practical use.' },
  { q: 'Can I charge my EV at home?', a: 'Yes! Most EVs come with a home charging cable that
plugs into a standard 15A socket. For faster charging, you can install a dedicated AC wall box
charger (typically costs ₹15,000-30,000).' },
  { q: 'What is the maintenance cost of an EV?', a: 'EVs require significantly less maintenance —
no engine oil, no timing belt, no clutch. Typical annual maintenance cost is ₹3,000-8,000
compared to ₹12,000-25,000 for petrol vehicles.' }
